FAB

WAS ESTABLISHED

As a company specializing in the production of living room furniture components, table bases, and dining surfaces.

True to its philosophy of creating long-lasting products, the company has evolved with dynamism, responding to today's market challenges with a pragmatic approach.

"We love to think that there is a FAB piece in every home"

FROM NEEDS TO RESULTS

FAB operates with a flexible production system on an international scale, serving both large-scale specialized retailers (Home Improvement and DIY) and the manufacturing industry. The organization is structured to manage complex, customized orders, ensuring continuity and technical precision.

Through the synergy of technology, organizational efficiency, and know-how, FAB provides a comprehensive and dependable service, focused on the unique requirements of different clients and global markets

VALUES

Reliability, expertise and an innate drive for innovation define FAB's identity. Building on this approach, the company is today a solid organization, fully aware of its past achievements and future goals.

FAB consistently invests in professional growth through ongoing training initiatives. Our corporate culture thrives on shared objectives and technical synergy, ensuring that every team member is fully aligned with the company's processes and long-term vision.

FAB deeply values the local environment, viewing it as a precious resource that demands the utmost respect.

Deeply rooted in its native land, the company has developed with full respect for nature and the surrounding landscape. FAB looks to the future with a responsible approach, investing in renewable energy and resource efficiency, with the goal of reducing waste and environmental impact.

Complex challenges are turned into tangible outcomes through a specialized ability to listen and transform every every need into a successful outcome.

PEOPLE

Technical competence and a proactive outlook define the shared path of all professionals within FAB.

PASSION

Expertise, energy, and passion represent the driving force behind FAB.

RESOURCEFULNESS

Vision, planning, and initiative: the pillars of the team's operations.

LEADERSHIP

Leadership and problem solving: the core of an efficient operation providing swift answers and practical solutions.

STRENGTHS

FAB operates as an advanced industrial system where technology, innovation, and expertise function within an integrated ecosystem. The company has successfully interpreted and spearheaded change, making active listening and customer focus a primary driver of its evolution.

Continuous process optimization enables the mastering of manufacturing complexity, turning it into a competitive edge that serves every project.

The strategy guiding FAB is based on a strong future-oriented vision, the diversification of its portfolio, and the comprehensive nature of the solutions offered: key elements through which the company consolidates trust and responds quickly and effectively to the requirements of its partners.

DISTRIBUTION IN 52 COUNTRIES

FAB leverages a robust organization and efficient processes to maintain a steady international presence. With distribution in over 52 countries, the company ensures reliable, punctual service and dedicated technical support.

PRODUCTION EFFICIENCY AND FLEXIBILITY

Production flexibility and a future-oriented vision have allowed FAB to evolve artisanal mastery into a solid industrial capability. The integration of cutting-edge technologies now enables the combination of high-volume efficiency with the versatility of bespoke solutions.

INFORMATION TECHNOLOGIES

Updating its information processes provides FAB with greater speed, flexibility, and operational efficiency, guaranteeing worldwide deliveries and full control of every stage of the value chain.

FAB evolves alongside its customers to anticipate the needs of future living

PRODUCTS

- ① **Worktop** (side) in CPL/HPL Laminated chipboard
- ② **Island** (central) in CPL/HPL Laminated chipboard
- ③ **Splashback** (wall) in CPL/HPL Laminated chipboard
- ④ **Doors/Drawers/ CoverPnl** in MFC/CPL/HPL, Lacquered chipboard
- ⑤ **Cabinets** (all over the kitchen)

MADE IN ITALY

FAB has progressively consolidated its identity by making 'Made in Italy' a core distinguishing element. The company's growth, the evolution of its processes and services, and the diversification of its portfolio have developed in continuity with a cultural and manufacturing heritage that provides recognizable added value to every project.

In the design industry, 'Made in Italy' represents an internationally acclaimed benchmark of quality; for FAB, it is both a defining identity and a constant drive for improvement.

MADE IN ITALY

Preserving the local territory through sustainable and responsible development: a core commitment to the future.

CERTIFICATIONS

Sustainability defines FAB's corporate identity and its strong territorial ties. The production site operates as an integrated 'green factory,' aligned with the surrounding landscape and natural balances.

This integration safeguards the local ecosystem while providing a restorative professional environment, driving both well-being and collaborator motivation.

Through its ongoing commitment, FAB has achieved several key certifications: quality management systems – **UNI EN ISO 9001**; environmental management systems – **UNI EN ISO 14001**; **FSC®** (FSC-C003034) Chain of Custody certification to promote environmentally appropriate, socially beneficial, and economically viable management of the world's forests; **PEFC** (PEFC/18-32-57) Chain of Custody certification to support sustainably managed forests globally; Occupational health and safety management systems – **BS OHSAS 18001**; Management Organizational Model – **M.O.G.**

ENERGY AND RECYCLING

FAB pursues a model of responsible growth through state-of-the-art technology and streamlined processes aimed at minimizing environmental impact.

By extending sustainability standards to every unit, the company turns ethical values into shared, measurable results.

The commitment to sustainability is reflected in the use of 100% renewable electricity, combining self-generation from on-site photovoltaic systems (over 20,000 sqm) with the purchase of Guarantees of Origin (GO) certificates.

FAB manufactures a portion of its products using recycled material panels, promoting a more responsible use of raw materials and reducing the reliance on virgin wood fibers. This is complemented by the recovery of production waste: particleboard residues are reused as alternative material for pallet manufacturing, utilized for on-site thermal energy production, or sent to specialized Italian recovery operators. These operators transform them into new recycled panels, which are then reintegrated into FAB's own products. In this way, the company fosters a more circular production cycle.
